

Athos

Description

Athos is a pilot operated gas regulator featuring excellent set pressure accuracy due to its minimum low flow capacity.

The design of the Athos offers high flow capacity and a large range of pressure regulation making it ideal for many applications.

The Athos regulator is typically used on small PRS skids for industrial applications.

It is also possible to incorporate a slam shut valve which reduces the installation footprint.

Technical Specification

Materials:

- Body: Ductile Iron
- Covers: Aluminium
- Internals: Brass / S.S. / Aluminium
- Seals: Buna N

Connections:

- 1 1/2" & 2"
- NPT / Flange ANSI 150#RF (available only for 2")
-

Limits of Operation:

- Temperature: -10°C to +60°C
- Regulating: 7.5 mbar to 2.4 bar
- Shutoff: 20 mbar to 2.5
